

ELIMINATOR™ TANKER ↙

CUSTOM DESIGN OPTIMIZED TO MEET YOUR OPERATIONAL REQUIREMENTS. ↙

KME Eliminator Tankers are designed to carry a large amount of water, with unmatched handling capabilities, while still providing the customer with hose storage space and ample compartment options. The Eliminator Tanker line is available in capacities ranging from 1,000 to 4,000 gallons.

The unique water tank design optimizes the weight distribution of the apparatus while providing a low center of gravity, low travel height and reduced overall length.

WITH AN ERGONOMIC PUMP OPERATOR'S PANEL DESIGN AND THE ABILITY TO INCORPORATE THE MAXIMUM AMOUNT OF EQUIPMENT STORAGE ON EITHER CUSTOM OR COMMERCIAL CHASSIS, THE ELIMINATOR TANKER IS THE ONLY CHOICE FOR A COMBINATION TANKER PUMPER UNIT.

ELIMINATOR™ TANKER ✓

SETTING THE STANDARD FOR WATER TANKER EFFICIENCY AND SAFETY.

Every Eliminator Tanker is custom designed to your department's specific needs to combine tank capacities up to 4,000 gallons with pumping systems to provide a tanker pumper combination unit to fulfill your requirements.

FEATURES

CUSTOM CONFIGURATIONS WITH TANK CAPACITIES UP TO 4,000 GALLONS

OPTIMUM WEIGHT DISTRIBUTION ON CUSTOM OR COMMERCIAL CHASSIS

LOW CENTER OF GRAVITY TANK DESIGN

MAXIMUM EQUIPMENT STORAGE AVAILABLE

ERGONOMIC PUMP OPERATOR'S PANEL

LOW TRAVEL HEIGHT, EVEN WITH LARGE HOSE LOAD REQUIREMENTS

MULTIPLE DUMP VALVE OPTIONS

CUSTOM DESIGNS AVAILABLE

SUPERIOR QUALITY ON THE SAFEST TANKER IN THE FIRE SERVICE

SAFEST WATER DELIVERY

The Eliminator Tanker is custom designed to lower the water tank center of gravity and distribute the water between the front and rear axles for better handling—this also reduces the cost of ownership.

LARGE WATER SUPPLY

The Eliminator body provides a large water storage capacity without sacrificing compartment space. Hundreds of compartment configurations are available, ranging from simple low-side compartments to full-height/split-depth compartments for pumper/tanker configurations.

ORGANIZED PUMP DESIGN

The Eliminator pump panel features an angled gauge panel for an improved view of the controls from the standard operating position, while still keeping the pump panel width as tight as possible. Packaged with a 1,500-gpm-rated pump performance and lowered single-stack crosslays.
